- **Spanish: Native**
- **English: B1**

ABOUT

I am passionate Frontend teacher with 2 years of experience in the educational field and training in Web Development. My journey at digital House has allowed me to enrich my students' skills in essential technologies such as HTML, CSS, SASS, JavaScript and React, as well as introduce them to the fascinating world of mobile technologies with PWAs. I possess a solid knowledge in Swift and its frameworks, with give me the ability to explore various architectures and design patterns. Currently, I am looking for a position as an iOS Developer, committed to continuous improvement and teamwork, where I can add value and share my experience.

WORK EXPERIENCE

Frontend Teacher | Digital House | Remote

Aug. 2022 - Present.

- As a Frontend Instructor, i taught courses in HTML, CSS, FIGMA, JavaScript and ReactJS, enhancing my pedagogical skills and my ability to communicate effectively .

Fullstack Web Developer | Freelance | Remoto

Sep. 2021 - Present

- Since September 2021, I have been working as an Independent Web Developer in Tucuman, Argentina, specialized in the MERN-PERN stack (MongoDB | PostgreSQL | Express | React | Node).
- I have implemented authentication systems with Firebase and payment gateways with MercadoPago and MODO, providing effective and tailored solutions.
- My commitment is focused on delivering quality work, always adapted to the project's needs.

Frontend Developer (Contracted) | Zoco | Tucumán.

Abr. 2022 - Aug. 2022

- At Zoco, as a Frontend Developer, I designed a price tracking dashboard using VueJS.
- I implemented libraries to generate statistical graphs, improving data visualization.
- I gained experience in Docker and Caravel, expanding my technical skills in a professional environment.
- This experience allowed me to master Vue, and Innovate technology that I enjoyed learning and applying effectively.

EDUCATION

Mobile Application Developer | Self-taught

- Passionate about mobile development, I have explored the Swift language since late 2023, studying thoroughly the official Apple documentation and advancing from UIKit to SwiftUI to create interfaces.
- I have experience in data management with CoreData and SwiftData, implementing Delegates and Observable design patterns.
- I love developing innovative projects and I have a portfolio available on my website for you to explore, with respective links to their repositories so you can take a closer look at the source code .

FullStack Web Developer | Soy Henry Bootcamp | Remote

2021

- I have gained fundamental knowledge in web development using the PERN stack (PostgreSQL, Express, React and Node) and being curious, I explored the use of non-relational databases such as MongoDB to add to my stack.
- During the final E-Commerce project, I worked in a team, where I stood out in creating a frontend with React, applying the MVC architecture.
- I developed a REST API to manage data collections, strengthening my technical and collaboration skills.

System Engineering | Universidad Tecnológica Nacional | Tucumán

- Although I did not finish the degree, I completed up to the fifth semester of System Engineering, where I gained a solid programming foundation, system analysis, and software development. This allowed me to develop technical and problem-solving skills, which I apply in my current projects.

Computer Technician | Instituto Herman Hollerith | Tucumán

2000

- I obtained the title of Computer Technician in high school, which provided me with practical knowledge in programming, hardware, and networks, laying the groundwork for my career in technology and software development.
